Web & Android Development

## SUMMARY

Hi! I'm **Divyanshu Patel**, an aspiring **Web and Android developer** currently in my second year at **VIT Chennai**. With a passion for Digital Concept Arts and Frontend Web Design, I enjoy creating fun and engaging web UI. I value simple content structures, clean design patterns, and thoughtful interactions.

My journey in web development began with a desire to transform my creative ideas into code. I'm also keen on expanding my knowledge in data structures and algorithms (DSA) and cybersecurity. Currently, I focus on building innovative web designs from scratch and bringing imaginative concepts to life in the browser.
